Projects

Pseudo Pet –
https://paw-sibilites-frontend.herokuapp.com/
https://github.com/G4-Final-Project
Rapidly developed MEAN-stack web app for parents to use as a tool to determine how ready their child a to own a pet. Built from the ground up integrating Angular Material, the Twilio API, and Node-Schedule

Do You Even Steam-
https://do-you-even-steam.herokuapp.com/
An app that uses API calls to the Steam API displays a user's total hours on the Steam gaming platform and then uses SQL to store and compare user on the leaderboard.

Business Time Backend –
https://github.com/CF-JS-iOS-G-5/javascript-back-end
Worked in tandem with an IOS frontend team to build a RESTful API backend. Utilized Test Driven Development, MongoDB

Work Experience

U.S. Forest Service, Arapaho National Forest
April 2016- September 2016
Biological Science Aid (seasonal): Using a systematic approach and a variety of methods, my crew and I applied specialized herbicide to control and eliminate invasive plant species throughout the district. Utilizing multiple delivery systems, we were able to target specific noxious plant species with minimum environmental impact.

LabCorp Seattle
January 2015 – September 2015
Accessioning Laboratory Assistant: At this position, I was responsible for the preparation of laboratory specimens prior to analysis and testing. For each sample, I received I would; transcribe patients handwritten medical info into the system, label each sample, and carefully aliquot each specimen to send to each testing department.

Clark-Hoeksema Investment Properties
April 2014 - August 2014
Contractor

Mount Hood Forest Service
June 2013 - September 2013
Forest Service Front-liner, **Lodge Tour Guide**
